"Wonderful...a thoughtful discussion of what made [the Greeks] so important, in their own time and in ours." —Natalie Haynes, Independent The ancient Greeks invented democracy, theater, rational science, and philosophy. They built the Parthenon and the Library of Alexandria. Yet this accomplished people never formed a single unified social or political identity. In *Introducing the Ancient Greeks*, acclaimed classics scholar Edith Hall offers a bold synthesis of the full 2,000 years of Hellenic history to show how the ancient Greeks were the right people, at the right time, to take up the baton of human progress. Hall portrays a uniquely rebellious, inquisitive, individualistic people whose ideas and creations continue to enthrall thinkers centuries after the Greek world was conquered by Rome. These are

the Greeks as you've never seen them before. From the inability of wealth to make us happier, to our catastrophic blindness to the credit crunch, Economyths reveals ten ways in which economics has failed us all. Forecasters predicted a prosperous year in 2008 for financial markets - in one influential survey the average prediction was for an eleven percent gain. But by the end of the year, the Standard and Poor's 500 index - a key economic barometer - was down 38 percent, and major economies were plunging into recession. Even the Queen asked - "Why did no one see it coming?" An even bigger casualty was the credibility of economics, which for decades has claimed that the economy is a rational, stable, efficient machine, governed by well-understood laws. Mathematician David Orrell traces the history of this idea from its roots in ancient Greece to the financial centres of London and New York, shows how it is mistaken, and proposes new alternatives. Economyths explains how the economy is the result of complex and unpredictable processes; how risk models go astray; why the economy is not rational or fair; why no woman has ever won the Nobel Prize for economics; why financial crashes are less Black Swans than part of the landscape; and finally, how new ideas in mathematics, psychology, and environmentalism are helping to reinvent economics. The idea of an ideological war between science and religion, Thompson argues, is founded on a mistake. But this does not mean that there is nothing at stake. For behind the ill-conceived conflict lie complex issues about the nature of mind, consciousness, experience, subjectivity, quality, value, and the like, all of which need to be disentangled and assessed in their own right. Outgrowing Materialism leads the reader through a sequence of five "Worlds," each of which offers a distinct way of understanding (or failing to understand) these issues, and where God might belong (or not). Writing accessibly, but with a sharp eye for detail, Thompson sheds new light on the familiar territory of materialism, dualism, and structural realism, and evaluates the growing attraction of the multiverse. He argues that dualism mechanized the material world; then materialism exorcised the mental "ghost" from the machine; and finally, this machine is evaporating into pure mathematics. Outgrowing Materialism is half of Ten Ways to Weave the World: Matter, Mind, and God. The sequel, Embodying Mind, discusses five "Worlds" that precede and follow those discussed here. However, Outgrowing Materialism stands in its own right as a critique of the modern science v. religion dilemma. "Esolen signals with this book his presence in the top rank of authors of cultural criticism." —American Spectator Play dates, soccer practice, day care, political correctness, drudgery without facts, television, video games, constant supervision, endless distractions: these and other insidious trends in child rearing and education are now the hallmarks of childhood. Is it something to be regarded as a work of beauty or art? Is it clever slogans or amusing prose? Is it workmanship to be judged for an award or recognition? It's none of the above. Advertising is salesmanship multiplied. Nothing more. And advertising copy, or copywriting, is salesmanship in print. The purpose of a copywriter's job is to sell. Period. The selling is accomplished by persuasion with the written word, much like a television commercial sells (if done properly) by persuading with visuals and audio. As Claude Hopkins wrote in his timeless classic, Scientific Advertising: "To properly understand advertising or to learn even its rudiments one must start with the right conception. Advertising is salesmanship. Its principles are the principles of salesmanship. Successes and failures in both lines are due to like causes. Thus every advertising question should be answered by the salesman's standards. "Let us emphasize that point. The only purpose of advertising is to make sales. It is profitable or unprofitable according to its actual sales. "It is not for general effect. It is not to keep your name before the people. It is not primarily to aid your other salesmen. Treat it as a salesman. Force it to justify itself. Compare it with other salesmen. Figure its cost and result. Accept no excuses which good salesmen do not make. Then you will not go far wrong. "The difference is only in degree. Advertising is multiplied salesmanship. It may appeal to thousands while the salesman talks to one. It involves a corresponding cost. Some people spend \$10 per word on an average advertisement. Therefore every ad should be a super-salesman. "A salesman's mistake may cost little. An advertiser's mistake may cost a thousand times that much. Be more cautious, more exacting, therefore. A mediocre salesman may affect a small part of your trade. Mediocre advertising affects all of your trade." These points are as true today as they were when they were written nearly one hundred years ago! So the goal then becomes: how can we make our advertising as effective as possible. The answer is to test. Test again. And then test some more. A Little Book about Big Change We all want the same things. We want to live a life of purpose and meaning. We want to leave a legacy for our children and grandchildren. We want to leave the world a better place. And yet we spend so much time wringing our hands over what's wrong and not nearly enough time fixing those things within our control. John Kasich has walked the corridors of power both in the politics, as a former leader of Congress, governor of Ohio, presidential candidate, and in the private sector, as an in-demand public speaker, best-selling author and a strategic advisor to businesses and large non-profits. Yet he's seen that the most powerful movements have started from the bottom up. Rather than waiting on Washington, the solutions happen once we become leaders in our own lives and communities. The strength and resilience of our nation lies in each of us. That's what this book is about. In It's Up to Us, Kasich shares the ten little ways we

each can bring about big change. Taken together, they chart a path for each to follow as we look to live a life bigger than ourselves. Taken one-by-one, they can help to lift us from a place of outrage or complacency or helplessness and move us closer to our shared American dream. In this sequel to *Outgrowing Materialism*, Thompson explores five conceptual "Worlds" that preceded the dualist v. materialist divide and shows why recent philosophy—often little-known outside of academic circles—is now giving these old ideas a new relevance. In an approachable way, but without avoiding complexity, *Embodying Mind* leads the reader through the Worlds of panpsychism, idealism, Aristotelianism, emergence, and information theory, holism, and process theology, examining the ideas of ethics and God, and the difficult questions, accompanying each. Thompson concludes that causal processes harmonize as in a cosmic counterpoint. The world and its beautiful contents form a seamless material whole. It is not as if Mind or God glints obscurely through ever-narrowing chinks in otherwise seamless nature. There are no chinks, but the whole is full of Mind. Overall, imperfectly, things are moving towards their sustaining good: God is becoming God, surpassing God. *Embodying Mind* can be read independently from *Outgrowing Materialism*, but together the two volumes of *Ten Ways to Weave the Word* mount a robust, wide-ranging case that nobody interested in the science v. religion debate, or wishing more widely for an integrated understanding of "Matter, Mind and God," can afford to ignore. *10 Ways to Screw Up an Ad Campaign* is a practical, no-nonsense guide to avoiding the most common pitfalls. Written for the small business, professional practitioners, and those who work in the advertising field, this book is chock-full of real life examples, provides readers with a guide to avoiding the most frequently made mistakes in advertising. It covers everything from how to select and work with advertising counselors to evaluating which media to use, and when, to how you can "out

advertise” the competition—even if you can’t outspend them. In addition to strategies for your creative and media campaigns, *10 Ways to Screw Up an Ad Campaign* addresses the most critical item of all—how to effectively measure the success of your advertising. In *Nothing To It, Brother* Phap Hai brings his characteristic warmth and humor to explore the many different gates to transformation offered by Buddhism. A gate is a teaching, practice, or way of looking at things. Each gate is an invitation to consider a new frame of reference through which we can consider our situation, an opportunity to look at things differently. Readers who enjoyed Bhante Gunaratana’s *Mindfulness in Plain English* will delight in this new explanation from the Australian-born senior monk of Deer Park Monastery in Escondido, California. There are fifty-eight gates explored in *Nothing To It*, arranged in ten traditional groups, with one chapter exploring each gate. Based on a series of talks given by Phap Hai in 2013, the book is designed to be equally valuable when read through at leisure or used as the text for a ten week self-guided course. Each chapter includes questions for reflection, additional reading suggestions on the topic, and writing exercises. The gates can be explored in order or investigated at random. Phap Hai’s charming blend of ancient wisdom, Dharma scholarship, and contemporary applications will offer all who read *Nothing To It* a new way of seeing the extraordinary opportunities for transformation in everyday life. Most of us are creatures of habit. Unfortunately some habits—specifically our thinking patterns—can be unhealthy. In *Shrink-Proof Your Life*, seasoned psychotherapist Peter Allman shares advice that will help us break away from negative habits or suffocating situations and illuminate the path toward an expanding life filled with more love, purpose, and joy. Allman, who has been a psychotherapist for more than twenty years, offers strategies to create stronger relationships, resolve inner and outer conflicts, and find the inner-strength to tackle obstacles. While teaching ways to work through normal feelings of sadness, annoyance, and grief, Allman also includes conversations with counseling clients that show practical approaches, helpful metaphors, and proven methods that train the mind to achieve better mental health and resiliency through life’s greatest challenges. Brutally honest and remarkably daring, *How to Lose a Girl in 10 Ways* is the account of Sean Smithson and the embarrassing situations he encountered in his quest to pick-up women over the years. An unassuming tax adviser in London’s financial district by day and an outrageous flirt by night, he amassed quite a few stories in his pursuit of the fairer sex during his 20s, and candidly confesses to 10 of his most epic fails; whether it was with colleagues, perfect strangers or even escorts. This revealing account has a sincere tone that will certainly invite a varied readership, with stories that would sit comfortably in both men’s and women’s magazines, though perhaps for different reasons. The insight into the male psyche goes far beyond the problem pages with some very awkward situations. Men can empathise with the writer and ‘may’ even have found themselves in similar situations, whereas women are always intrigued by the inner workings of the male species. But regardless of what side of the fence you sit on, the author’s self-deprecating and humorous tone should ensure that you walk away laughing. It could be at him or with him – but that’s something the reader should decide. “Your adventures never cease to amuse and disgust me at the same time. And yet as a single lady, I continue to be intrigued as to how bad it would actually be to sleep with you.” Sean Smithson’s content and writing style have drawn initial comparisons to Neil Strauss and Tucker Max, but rather than celebrate his womanising ways, he acknowledges the flaws in his character and seeks to entertain readers by poking fun at them. Married, divorced, single or in a relationship, this book will be enjoyed by anyone intrigued by the inner workings of a player. What are demons? Why do they need a human body?
