Writing about Learning and Teaching in Higher Education offers detailed guidance to scholars at all stages-experienced and new academics, graduate students, and undergraduates-regarding how to write about learning and teaching in higher education. It evokes established practices, recommends new ones, and challenges readers to expand notions of scholarship by describing reasons for publishing across a range of genres, from the traditional empirical research article to modes such as stories and social media that are newly recognized in scholarly arenas. The book provides practical guidance for scholars in writing each genre-and in getting them published. To illustrate how choices about writing play out in practice, we share throughout the book our own experiences as well as reflections from a range of scholars, including both highly experienced, widely published experts and newcomers to writing about learning and teaching in higher education. The diversity of voices we include is intended to complement the variety of genres we discuss, enacting as well as arguing for an embrace of multiplicity in writing about learning and teaching in higher education. A monster breaks through the wall and into the bedroom of an imaginative child who finds a way to return the visit with a trip to monsterland. Essential Austin-Healey 100 and 3000 Mike Lawrence Subtitled: The Cars and Their Story 1953-67. First there were the standard Austin Seven and Morris Mini-Minor saloon, van, pick-up and estate versions.

Then came a whole family of Mini-Coopers, the upmarket Wolseley and Riley models, the Moke and the Clubman. Later, in the 1980s and '90s, there were no less than 41 UK Limited Editions, with exotic names like Ritz and Tahiti, and 56 International Special Editions for specific export markets, for example the Mr Bean for Japan and the Cooper Silver Bullet for Germany. Minis were also built in many countries, from Italy to Australia and Uruguay, with their own modifications. And there were the distinctive and expensive coach built Minis, beloved of film and pop stars, from firms like Wood & Pickett, Bertone, Radford, Tickford and others, including the fearsome ERA Mini Turbo. Absolutely all of these Minis are covered in this book, with photographs, descriptions, specifications, performance figures, and production dates and numbers. Whether you want to look up or identify a particular Mini or simply absorb the enormous range and variety of the Mini's incarnations, this, never attempted before, is the book. Donald Healey began building cars in 1946 and at the 1952 Motor Show he exhibited the prototype Healey 100. Because an A90 engine was used BMC decided to incorporate the model and by the spring of 1953 it became the Austin-Healey 100. In the following six years more than 29,000 were built. A four-speed gearbox came in 1955 and a six-cylinder engine in 1956. The 100/6 was a little larger and allowed for 2+2 seating. Production of a pure two-seater returned in 1958. The rarest of the models are the 100S of 1955 and the 100M of 1955-6, both being tuned versions. This book is a collection of road tests, model introductions, specification and technical data, and driving impressions. Also covers the record breaking and buying an Austin-Healey today. Models covered are 100, 100/4, 100/6, 100/S, 100/M, Mille Miglia. Seventeen-year-old Keri likes to plan for every possibility. She knows what to do if you break an arm, or get caught in an earthquake or fire. But she wasn't prepared for her brother's suicide, and his death has left her shattered with grief. When her childhood friend Janna tells her it was murder, not suicide, Keri wants to believe her. After all, Janna's brother died under similar circumstances years ago, and Janna insists a visiting tourist, Sione, who also lost a brother to apparent suicide that year, has helped her find some answers. As the three dig deeper, disturbing facts begin to pile up: one boy killed every year; all older brothers; all had spent New Year's Eve in the idyllic town of Summerton. But when their search for the serial killer takes an unexpected turn, suspicion is cast on those they trust the most. As secrets shatter around them, can they save the next victim? Or will they become victims themselves? Introductory Statistics is designed for the one-semester, introduction to statistics course and is geared toward students majoring in fields other than math or engineering. This text assumes students have been exposed to intermediate algebra, and it focuses on the applications of statistical knowledge rather than the theory behind it. The foundation of this textbook is Collaborative Statistics, by Barbara Illowsky and Susan Dean. Additional topics, examples, and ample opportunities for practice have been added to each chapter. The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in teaching this course. These choices led to innovations in art, terminology, and practical applications, all with a goal of increasing relevance and accessibility for students. We strove to make the discipline meaningful, so that students can draw from it a working knowledge that will enrich their future studies and help them make sense of the world around them. The vision of one man, Captain Sherman "Red" Crise formed the basis for what was to become the Bahamas Speed Weeks, a series of motor races held on the island of New Providence in the Bahamas. They started in the mid 1950s and continued for 13 years, before ending due to a mix of political decisions, ill fortune and a shift in the direction motor racing had taken over that period of time. These years were described by many commentators as the golden age of motor racing, where internationally acclaimed drivers attended the Speed Weeks to mix with the many amateur racers from America who came to enjoy the scenario of sun, parties and racing. For many drivers the social scene was as important as the racing, and in latter years prize money was an extra incentive to turn up. This well researched account tracks the history of the Speed Weeks with its roller-coaster ride throughout its 13 years existence, and includes stunning photos, complete statistics, and more. With a foreword by Denise McCluggage. This book covers British car electrical systems from 1950 to 1980. Particular emphasis is placed on the Lucas, Smith and SU components that were ubiquitous in British cars of the period. Each major system is given its own chapter, providing theory, component parts and full system operating explanations. Modifications are suggested for those wishing to bring performance and reliability up to more modern standards. Fault-finding charts, cross referenced to the appropriate pages in the book, are provided throughout. The essential companion to Cooper and Cooper S models from the 997cc MkI to the late 1275cc MkIII, including the Italian Innocentis, the Spanish-built Authis, Australian versions, and the Rover Coopers. Exhaustive research yields a wealth of heretofore unpublished information. The T Series MGs, starting with the TA introduced in 1936, represents the absolute archetype of the British sports car. These cars provide the authentic experience of sports car driving: the snug two-seater cockpit, quick steering, firm suspension, flat cornering, snappy gearchange and lively engine. Then there are the looks: the long bonnet, swept wings, cutaway doors, slab tank and rear-mounted spare wheel established a unique style. In addition, the T Series MGs opened the door for the British sports car's conquest of the U.S. market. The four-cylinder Austin-Healey 100 sports car had already made a big name for itself by the time the 2.6-litre six-cylinder 100/6 arrived in 1956. This came as a 2+2 seater, joined in 1958 by a two-seat version, and both were replaced by the more powerful 3000 model in 1959, again offered as a two-seater or 2+2, and available with**

disc brakes. The Mk II 3000, launched in 1961, could be had either as the limited-production 132bhp two-seater with triple carburettors and side screens, or as the less spartan 2+2 convertible with wind-up windows, and the final version was the 2+2-only 1964 Mk III, now with 150bhp, a wooden dash and better appointments. All these "Big Healeys" are as much admired today as when they were new, and here marque expert Bill Piggott gives full details of correct specification and equipment for all these cars, backed up by in-depth colour photography of outstanding examples of all models and variants. Body panels, external trim and badging, paint colours, interior trim, dashboard, instruments and controls, under-bonnet components, engine and transmission, lamps, and other features right down to the tool kit, are all covered. Austin-Healey 100 & 3000 John Heilig The Big Healeys were produced from 1953 to 1968, and were the fastest and most glamorous of all Healey offerings. Although they were built in England, a full 89% of them were exported to the US. In this beautifully produced work Heilig profiles dozens of pristine examples of the big Healeys from around the world. A fresh and fascinating look at a classic British sports car. Sftbd., 8 1/4x 1 5/8, 128 pgs., 4 b&w ill., 76 color. This is the authorized biography of one of the best-liked bad boys in British motorsport. John Chatham, driver, racer, repairer, rebuilder, tuner, trader and lover of Austin-Healeys, was in the words of Geoffrey Healey "uncontrollable" in his youth, and has only mildly mellowed with age. Burly and genial but formidably competitive, and not above bending the rules when he thought he could get away with it, to many he is the archetypal club racer. John is so synonymous with Austin-Healeys that the most famous racing Healey in the world, DD300, is so well-known mainly because John campaigned it for decades, notching up tens of thousands of racing miles. But his career embraces far more than one car, and until this biography no-one had attempted to fill in the gaps. The book is not a dry description of one club race after another. It does include a list of John's principal sporting achievements, but no complete record exists of the hundreds of events which made up his competitive career, so the writer has not attempted to compile one. Instead Norman Burr, who was himself acquainted with John in his youth, has created a more rounded and personal account, full of motoring and sporting anecdotes, but also telling the story of John's family, his work, his business, his three wives and his lovers. John has a comprehensive photo library from which the book is generously illustrated, with cartoons added to illustrate some of the moments that a camera was not around to record. Thoroughly politically incorrect even by the standards of the 1960s, it's an account which will strike a chord not only with admirers of Big Healeys, but also with anyone who believes that independent thinking, and the courage to apply and enjoy it, is the greatest virtue of all. This is a maintenance and repair manual for the DIY mechanic. It provides all you need to know about servicing the Austin Healey 100. His new book, Works Healeys in Detail, joins his respected Works Triumphs and Works Escorts in our list. Here he tells of the story of Donald Healey's introduction of the cars of his own make into the world of rallying and racing, from the Healey Elliott and Westland of the late 1940s through to the last racing Austin-Healey Sprite in 1967. In between he produced competition versions of the Austin-Healey 100 and 100S, the 100-6 and the gloriously successful 3000, a brutal and wayward machine that won countless international rallies in the 1960s in the hands of great drivers like Pat Moss, Timo Makinen, Rauno Aaltonen and Paddy Hopkirk, to name but a few. The book covers the career of each of the works cars individually: entries, drivers and results, with nearly all cars illustrated. In addition there is detailed colour photography of important surviving examples. This long out of print classic has now been revised and updated. The most comprehensive account of British cars ever published, this book presents a huge amount of historical and technical information. Nearly 700 manufacturers and 3,700 individual models are profiled, including technical specs for most cars. The models created by Donald Healey and son Geoffrey played a key role in establishing Britain as the world's leading producer of sports cars in the 1950s and 1960s. But the cheeky little Austin-Healey Sprite and the rugged 'Big Healey' with its muscular good looks are only part of a fascinating story that stretches back to the glory

days of pre-war rallying and ends with the ill-fated Jensen-Healey. All this and more is told in the latest title in Haynes's acclaimed 'Classic Makes' series - along with practical guidance in the form of driving impressions and buying hints, based on the author's personal experience of most of the cars featured. Winner of the Pulitzer Prize "A masterwork . . . the novel astonishes with its inventiveness . . . it is nothing less than a grand comic fugue."—The New York Times Book Review A Confederacy of Dunces is an American comic masterpiece. John Kennedy Toole's hero, one Ignatius J. Reilly, is "huge, obese, fractious, fastidious, a latter-day Gargantua, a Don Quixote of the French Quarter. His story bursts with wholly original characters, denizens of New Orleans' lower depths, incredibly true-to-life dialogue, and the zaniest series of high and low comic adventures" (Henry Kisor, Chicago Sun-Times). Motor sports. In nine eventful years - 1957 to 1965 - the six-cylinder-engined Austin Healey evolved into a formidable and increasingly specialised rally car. By any standards, it was the first of the "homologation specials" - a type made progressively stronger, faster, more versatile, and more suitable for the world's toughest International rallies. Though the motorsport foundations had been laid by the Healey Motor Co. Ltd, the work needed to turn these cars into rock-solid 210bhp projectiles was almost all completed by the world-famous "works" BMC Competitions Department at Abingdon. It was because of their vast experience that the "Big Healeys" as they were always affectionately known - became fast and tough, nimble yet durable, so that they were capable of winning major events wherever traction could be assured. Not only did the "works" Austin Healeys win some of the world's most famous events - including Liege-Sofia-Liege, Spa-Sofia-Liege and the French and Austrian Alpine rallies, but they were also supremely fast on events like the Tulip, and came so close, so often, to winning their home event, the British RAC Rally, which traditionally ended the season. Not only did these cars turn their drivers - Pat Moss, Donald Morley, Rauno Aaltonen, Timo Makinen and Paddy Hopkirk among them - into heroes, but individual cars seemed to take on a character and reputation of their own. This book lists each and every success, each and every notable car, and traces exactly how the machinery developed, and improved, from one season to the next. Over time, the "works" cars not only adopted aluminium cylinder heads and body panels, much-modified chassis, transmission and exhaust systems, but they also became supremely strong and could withstand a true battering on the world's toughest events. This book relates how the cars were improved by the engineers, how the drivers came to love their heavy and sometimes self-willed steeds, and how the management team got the most out of everything - machinery, personnel, drivers, and regulations. . Heavily illustrated and packed with technical detail

this book will make a welcome addition to any motorsport fans library. Playful but ominous, 10 Mississippi reads like a game of hide-and-seek set in America's rising floodwaters of text and technology. Fluid, lively, and referential, 10 Mississippi samples language from many cultural tributaries, performing sequels of celebrated twentieth-century poems, darkly riffing on advertising slogans, tongue twisters, formulaic news reports, and everyone's favorite twenty-six-letter sentence, "The quick brown fox jumps over the lazy dog." Like the proverbial river that is never the same twice, Healey's poems channel the constant transformation of the modern world and embrace the human drama in all its absurd variety.
